

Infectious Diseases & Immunity Seminar Series

MONDAYS 9-10 AM

338 Koshland Hall (NEW LOCATION)

FEB 3 **Manchuta Dangkulwanich, Bustamante Lab**
Transcription and its regulations, one molecule at a time

FEB 24	Blossom Damania, University of North Carolina, Chapel Hill Professor of Microbiology and Immunology <i>KSHV encoded viral homologs: Roles in cell survival and immune evasion</i>
--------	---

MAR 3 **Aaron Whitely, Portnoy Lab**
*Genetic determinants of c-di-AMP essentiality in *Listeria monocytogenes**

MAR 10 **Trever Green, Coscoy Lab**
Induction of natural killer cell activating ligands by mouse cytomegalovirus

MAR 17 **Ebere Sonoiki, Rosenthal Lab, UCSF**
Dissertation seminar: *The mechanism of action of two benzoxaboroles against *P. falciparum**

MAR 31	Nevan Krogan, UCSF Professor of Cellular and Molecular Pharmacology <i>TBA</i>
--------	--

APR 7 **Fenna Sille, Smith Lab**
The effects of arsenic exposure on immune development and infectious disease susceptibility

APR 14 **Arunan Skandarajah, Fletcher Lab**
A novel device for low cost, point-of-care diagnosis of drug resistant TB in Vietnam

APR 21 **Kim Sogi, Stanley Lab**
*The importance of cellular metabolism for control of *M. tuberculosis* infection*

APR 28 **Kristie Ibarra, Harris Lab**
Prophylactic and Therapeutic Human Monoclonal Antibodies against Dengue
